

## Frequently Asked Questions Pink Eye Spray

1. How is Vetericyn Pink Eye Spray applied?
  - A. Pink Eye Spray is a liquid that is applied by spray. It can be sprayed directly into the eye by either turning the nozzle to “Spray” or “Stream”.
2. On which animals can Pink Eye Spray be used?
  - A. Pink Eye Spray may be used or applied on all animals as it is designed to clean and flush the eyes of pollutants and irritants. It is also clinically proven to kill the bacterium that causes bovine conjunctivitis in-solution. It is 100% non-toxic and completely biocompatible.
3. How long has it been tested on animals?
  - A. Vetericyn Pink Eye Spray is a new product, which is based on the Microcyn Technology platform. Microcyn Technology has been used for over 7 years on humans and on animals for over 5 years.
4. Are there any known side effects?
  - A. In the 27 clinical trials and use on over two million human patients there has not been a single report of an adverse effect.
5. Can I draw the product out of the bottle with a syringe to apply to the eye?
  - A. Yes but the syringe or dropper must be HDPE or PTE plastic or it can be glass. The syringe or dropper must also be clean and sterile and we recommend using a brand new dropper.
6. What is the difference between Vetericyn Pink Eye Spray and Vetericyn Wound and Infection Treatment?
  - A. Vetericyn Pink Eye Spray has been formulated especially for use in the eye and is actually a stronger solution than the Wound & Infection solution.
7. How often do I need to apply it when my animal has pink eye?
  - A. Ideally it would be applied several times a day. However, once per day can still be beneficial.
8. Will the Pink Eye Spray aid in deterring flies?
  - A. It is not specifically designed to deter flies. However, Vetericyn Animal Ophthalmic Gel kills bacteria that cause infections that can be spread by insects and flies. The bacteria in the infection can be one of the major factors that attract flies.

9. How is the Pink Eye Spray different than the Eye Wash?
  - A. The Pink Eye Spray was specially formulated for the eye with a more potent formulation.
