

Dog with Wounds and Sores from Mange*

BEFORE

AFTER 30 DAYS

Information displayed is provided by our customers. Vetericyn is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions. *Use for the care of wounds caused by mange. In the case of mange, a treatment to kill the mites is still required. Vetericyn was used in conjunction with antibiotics.

Immediate Acting, One-Step Wound & Infection Care

Vetericyn animal wellness products are innovative topical solutions for the care of wounds, infections and irritations caused by bacteria, viruses, fungi or spores. This steroid-free, antibiotic-free, no-rinse solution is non-toxic. Made up of compounds similar to those produced by the animal's own immune system, Vetericyn will not harm healthy tissue. Vetericyn products are manufactured within an appropriate physiological pH range so they will not sting when applied. This product, in solution, kills 99.999% of bacteria, viruses, fungi and spores including E.coli, Staph (MRSA), Strep, Moraxella bovis, Pasteurella, Actinomyces and Pseudomonas aeruginosa. Tests free for competitive animals.

"This Chow dog had such a severe case of mange that the open wounds all over his body were oozing constantly. The dog was brought into Dr. Leonard Sigdestad who did not believe the hair would grow back and was unsure if the dog would survive. He was cared for with Vetericyn and one round of antibiotics.

Comments:

Within 1 day of using Vetericyn Dr. Sigdestad was extremely impressed with the results. The wound sites were slightly pink (due to an increase of oxygen) and were already improving. The wounds began recovering immediately and within 2 weeks the dog began to grow hair again. At 30 days the dog's lesions were gone and all hair grew back!"

Use For:

- Abscesses Caused from Pigeon Fever/Strangles /Dryland Distemper
- Skin Rashes
- Scratches
- Skin Ulcers
- Ringworm
- Hot Spots
- Rain Rot
- Cuts
- Eye Infections*
