

Horse With Laceration Below Knee and Scrape to Forearm

DAY 1

4 DAYS

AFTER 90 DAYS

Information displayed is provided by our customers. Vetericyn is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions.

Vet Name:	Elizabeth Gibson
Patient:	Gonifs Dry Cocktail (Cocktail) – 7 year old QH Mare
Wound/Ailment:	Laceration below knee with additional scrape up forearm – while in turnout horse fell under a wire fence.
Vetericyn Product:	Vetericyn VF Wound & Infection Care (pn 2000) Vetericyn VF Wound & Infection HydroGel (pn 2040)
Application: (initial usage, current usage, protocol)	Day 1 (July 4th): Used liquid wash to clean out debris 3x. Day 2-14: Removed debris with wound wash if necessary. Waited 10-15 minutes then covered with hydrogel spray to protect horse before she was turned back out - 2x/day. Day 14-21: Applied hydrogel spray -1x/day.
Healing Period:	Primary healing was done within 14 days. On the deepest wound hydrogel spray was continued for an extra week until all scabbing was done.
Trainer Comments:	<p>"I was very impressed with how quickly we saw results with this product – within 3 days what had started as a deep laceration with a partially attached skin flap had closed to a mild laceration. After the initial healing, the laceration took a few days to close but the hydrogel did a good job of forming a protective layer over the wound. I also really liked the ease of use – spray and walk away. It took much less time than traditional scrubbing/rinsing and applying ointment.</p> <p>Two other boarders in the barn were so impressed with the results that they have also purchased bottles from there vets to add to their first aid kits!"</p> <p>Elizabeth Gibson</p>

Immediate Acting, One-Step Wound & Infection Care

Vetericyn animal wellness products are innovative topical solutions for the care of wounds, infections and irritations caused by bacteria, viruses, fungi or spores. This steroid-free, antibiotic-free, no-rinse solution is non-toxic. Made up of compounds similar to those produced by the animal's own immune system, Vetericyn will not harm healthy tissue. Vetericyn products are manufactured within an appropriate physiological pH range so they will not sting when applied. This product, in solution, kills 99.999% of bacteria, viruses, fungi and spores including E.coli, Staph (MRSA), Strep, Moraxella bovis, Pasteurella, Actinomyces and Pseudomonas aeruginosa. Tests free for competitive animals.
