

Horse with Shoulder Laceration

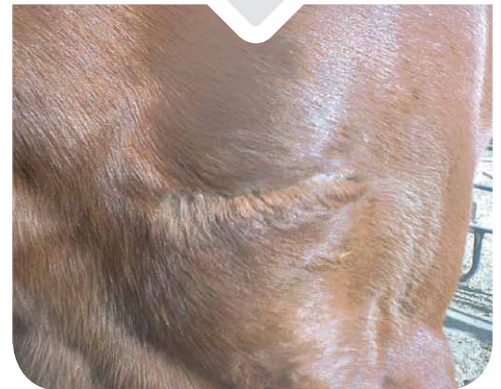

BEFORE

7 DAYS

AFTER 49 DAYS

Information displayed is provided by our customers. Vetericyn is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions.

Owner:	Christina Sivils
Patient:	Reba - Mare
Wound/Ailment:	Cut on front of shoulder at the top of the shoulder blade.
Vetericyn Product:	Vetericyn Wound & Infection Care (Liquid)
Application: (initial usage, current usage, protocol)	We used Vetericyn 3x daily for three weeks, with hosing every few days to remove drainage and dirt, then 2x daily until healed. Vetericyn was the only product used.

Healing Period:	7 weeks
------------------------	---------

Owner Comments:

“It is wonderful to finally find a product that not only works well, but is easy to use. Most products either sting or have a strong odor the horses object to, but not this! I applied the Vetericyn to my mare’s wound without even putting a halter on. She even seemed to look forward to it.”

I was amazed at how quickly she healed and how well the deepest part of the wound filled in and healed over! I am recommending your product to all my friends!”

Christina Sivils

Immediate Acting, One-Step Wound & Infection Care

Vetericyn animal wellness products are innovative topical solutions for the care of wounds, infections and irritations caused by bacteria, viruses, fungi or spores. This steroid-free, antibiotic-free, no-rinse solution is non-toxic. Made up of compounds similar to those produced by the animal’s own immune system, Vetericyn will not harm healthy tissue. Vetericyn products are manufactured within an appropriate physiological pH range so they will not sting when applied. This product, in solution, kills 99.999% of bacteria, viruses, fungi and spores including E.coli, Staph (MRSA), Strep, Moraxella bovis, Pasteurella, Actinomyces and Pseudomonas aeruginosa. Tests free for competitive animals.
