## Vetericyn® Product Catalog

# Safe & Effective Animal Wellness Products

**Vetericyn® animal wellness products are innovative topical solutions for the care of wounds, infections and irritations caused by bacteria, viruses, fungi or spores. This steroid free, antibiotic free, no-rinse solution is non-toxic. Made with a compound similar to that produced by the animal's own immune system, Vetericyn will not harm healthy tissue. Vetericyn products are manufactured within an appropriate physiological pH range and will not sting when applied. These products, in solution, kill 99.999% of bacteria, viruses, fungi and spores including E.coli, Staph (MRSA), Strep, Moraxella bovis, Pasteurella, Actinomyces and Pseudomonas aeruginosa. Tests free for competitive animals.**

## Product Features

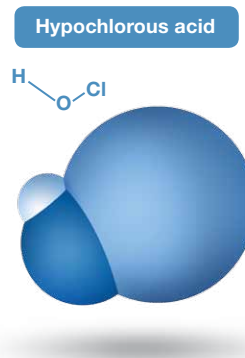

Non-toxic
No steroids, antibiotics, alcohols or tea tree oil
Aids in speeding the healing process
Does not sting or irritate
Safe to use around the eyes, ears, nose and mouth
Does not harm healthy tissue
Reduces irritation
Safe as saline
Can be used on a broad spectrum of animals including puppies and kittens
Will not stain surfaces after application to animal (skin, hair, fabric, furniture, or equipment)
No rinsing required

In solution kills 99.999% of most bacteria, fungi, viruses and spores (including MRSA, E. coli, Strep, Staph, Pasteurella) in just 30 seconds

## Chemistry of Vetericyn

The active ingredient in all of these products is hypochlorous acid. In some products, sodium hypochlorite is used in trace amounts as a preservative. The pH of Vetericyn is manufactured in the appropriate physiological range, unlike diluted bleach which has a pH > 11. At an appropriate physiological pH, diluted bleach is unstable and has limited efficacy as an antimicrobial. Laboratory tests show that in solution, Vetericyn is up to 70x more effective against bacteria than diluted bleach, yet is 100% non-toxic.

# Wound & Skin Care - Liquid

# Testimonials

Real results from real users:

Information displayed is provided by our customers. Vetericyn is a great addition to any wound care regimen. Always consult with a veterinarian for systemic conditions.

In some cases (listed above), Vetericyn was used in conjunction with antibiotics.

\*Vetericyn cares for the secondary infections caused by Dryland Distemper.

\*\*Use for the care of wounds caused by mange. In the case of mange, a treatment to kill the mites is still required.

## Application Regimen

Clean and debride wound as needed with Vetericyn. Allow Vetericyn to saturate the area for 30 seconds. The benefits of Vetericyn can last up to six hours. There are no known contraindications nor are there any known negative drug interactions.

- Do not decant
- Not recommended to use with other topical wound care solutions
- Safe to use in conjunction with systemic antibiotics
- Safe to use with dressing if needed
